

SAGAR-SAKSHI · PROTOTYPE EVIDENCE CARD

Smart India Hackathon 2026 | Team Tantragyan (SIH26143) | Run ID: test_e2e_run_001

EVIDENCE GRADE	GRADE A
HEADLINE ASSESSMENT	Strong lead; consistent with discharge by SYN-KERALA-LEAD-01
AIS DATA STATUS	SYNTHETIC
MANIFEST HASH (SHA-256)	6b6f92752980c0a540b9cdde9ca827140497244ec94e8148528741eabf94cca1

Candidate Hypothesis Ranking (normalized, not calibrated)

Values below are normalized prototype ranking weights derived from hand-set likelihood ratios; they are not calibrated probabilities.

Hypothesis / Source	Ranking weight	Drift Fit	Head Prox.	Behavior
SYN-KERALA-LEAD-01	0.9246 (92.5%)	2.50	2.50	1.00
Null / Unknown Source (U)	0.0688 (6.9%)	N/A	N/A	N/A
SYN-DEMO-BG-03	0.0066 (0.7%)	0.38	0.05	1.00

Exculpatory Evidence: Excluded Vessels

Vessel ID	Exclusion Reason
SYN-DEMO-BG-02	Track never entered backward reachability envelope (closest approach: 21.4 nm)

Run Sources and Prototype Limitations

Run property	Recorded value
SAR source	synthetic_demo_raster
Synthetic SAR crop	True
Forcing source	configured_constant_defaults
Drift engine	custom_time_stepped_advection_approximation
Probabilities calibrated	False

This prototype may use generated SAR and synthetic AIS, and currently uses configured constant forcing with simplified drift calculations. It does not fetch CMEMS/ERA5 or run OpenDrift. Coverage must be independently measured before an unmatched SAR target can be called dark. Evidence grades and ranking weights are experimental decision-support outputs, not calibrated probabilities or findings of liability.
